

## My Spouse Works for CHI Also

**Question:** My spouse works for CHI also and is currently covered under my insurance. Why do I not see a spouse invite option?

**Answer:** If your spouse also works for CHI, he/she has his/her own CHI log in credential to Inside CHI and well-being site. Have your spouse simply log in as he/she normally would under Employee Login tab and not Spouse Login tab. "Spouse invite" is for spouses that do not work for CHI, so they would have a way to log into the Wellness Program website. On your [Wellness page](#) in the well-being site, you can still see your CHI employed spouse's earned dollar information.
